

DENTAL EL ALETLERİ

DENTAL INSTRUMENTS

ERSOY / ODC

► ersoydental.com

Geçmişten günümüze, Ersoy Dental'ın en önemli gücü müşteri memnuniyetine verdiği önemdir. Şirket, müşteri taleplerini dikkate alarak sürekli olarak ürün yelpazesini güncellemekte ve geliştirmektedir. Aynı zamanda, ülke genelinde geniş bir bayi ağı oluşturarak her bölgenin ihtiyaçlarına hızlı ve etkili bir şekilde cevap vermektedir.

Ersoy Dental, sektördeki tüm yenilikleri yakından takip eden bir vizyonla hareket etmektedir. Teknolojik ve ekonomik gelişmeleri sürekli olarak değerlendirerek ürünlerini şekillendiren firma, bu sayede müşterilerine her zaman en iyi ve en güncel çözümleri sunma konusundaki liderliğini sürdürmektedir.

Misyonlarının temelinde dürüstlük, güvenilirlik, şeffaflık ve yenilikçilik ilkesini benimseyen Ersoy Dental, hekimlerin mutluluğunu ve uzun vadeli kazancını ön planda tutarak sektördeki saygın konumunu korumaktadır. Geçmişten günümüze süregelen bu başarı hikayesi, firmanın kalite standartlarına olan bağlılığı ve müşteri odaklı yaklaşımıyla şekillenmiştir.

Throughout its history, Ersoy Dental's most significant strength has been its emphasis on customer satisfaction. The company consistently updates and improves its product range by considering customer requests. At the same time, it has established a wide network of dealers nationwide, ensuring a rapid and effective response to the needs of every region.

Ersoy Dental operates with a vision that closely follows all innovations in the industry. Continuously evaluating technological and economic developments to shape its products, the company maintains its leadership in providing customers with the best and most up-to-date solutions.

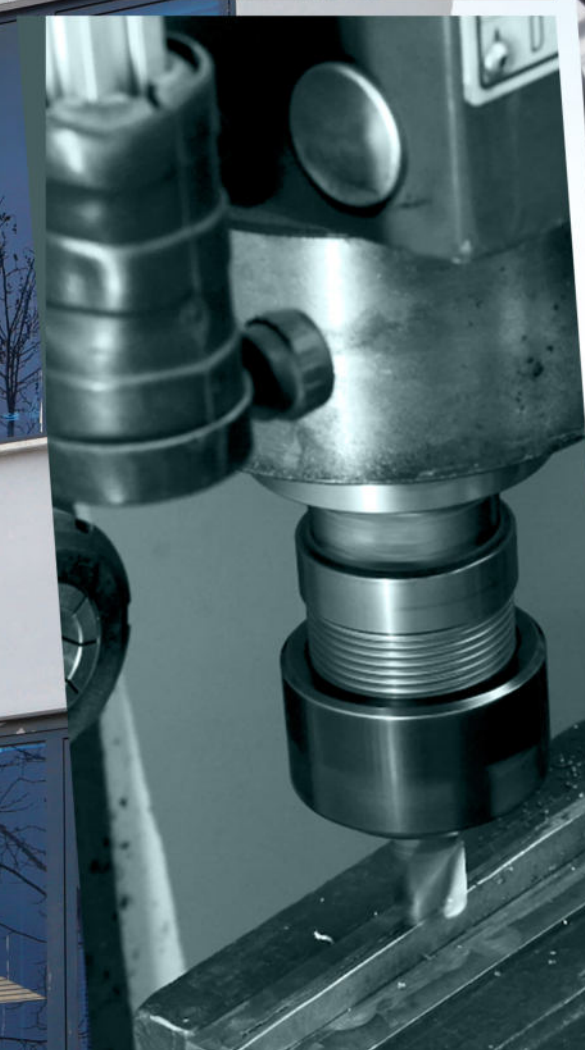

Rooted in the principles of honesty, reliability, transparency, and innovation, Ersoy Dental's mission focuses on prioritizing the happiness of healthcare professionals and their long-term gains, thereby preserving its esteemed position in the industry. This success story, continuing from the past to the present, has been shaped by the company's commitment to quality standards and a customer-centric approach.

DAVYELER DIVISIONS

Bu aletler, diřleri yuvalarından ıkarmak iin zel olarak tasarlanmıřtır. ekim pensleri (Davye) nceden lkse olan diřlerde kullanılır ve diřleri yuvasından ıkarmak iin kullanılmamalıdır. Ek olarak, Davye kontroll kuvvetler altında kullanıldıėında alveol kemiėini geniřletebilir.

These instruments are specifically designed for removing teeth from their socket. Extraction forceps are used to previously luxated teeth and should not be used to pull teeth out of their sockets. In addition, the extraction forceps can expand the alveolar bone when used under controlled forces.

ELEVATÖRLER ELEVATORS

Bir diřin veya tutulan kklerin ıkarılması sırasında kaldıra olarak kullanılması amalanan, elde tutulan, manuel, diřçilik cerrahi bir alettir. Tipik olarak, distal alıřma ucunda gl ancak ince bir biaa sahip tek para bir alettir veya merkezi bir sap ile ift ulu olabilir.

It is a hand-held, manual, dental surgical instrument intended to be used as a lever during the extraction of a tooth or retained roots. It is typically a one-piece instrument with a strong but slender blade at the distal working end, or it may be double-tipped with a central handle.

Lussatore Kök Elevator, dişin ya da kalmış köklerin çekilmesi için kaldıraç olarak kullanılır. Dişi çevreleyen dokuyu diş etleri ile dişin dış kısmı arasında iterek gevşetmek için kullanılır. Bıçak, sapın uzun eksenini etrafında döndürülmesiyle oluşturulan bir kuvveti dişin veya kökün yüzeyine iletir.

Lussatore Root Elevator is used as a lever for the extraction of a tooth or retained roots. It is used to loosen the tissue surrounding the tooth by pushing it between the gums and the outer part of the tooth. The blade transmits a force, generated by rotating the handle around its long axis, to the surface of the tooth or root.

PORTEGÜLER NEEDLE HOLDERS

Dikiş atma sırasında iğneyi ve ekli dikiş doku boyunca iterken/ çekerken bir dikiş iğnesini kavramak için tasarlanmış, elle tutulan bir cerrahi alettir. Tipik olarak metalden yapılır ve iğnenin daha iyi kavranmasını sağlamak için distal uçta kısa tırtıklı çenelere sahiptir.

It is a hand-held manual surgical instrument designed to grasp a suture needle when pushing/pulling the needle and attached suture through tissue during suturing. It is typically made of metal and has short, serrated jaws at the distal end to provide better grip of the needle.

KLEMLER FORCEPS

Klemler, Kanayan damarları kavramak ve tutmak için kullanılır. Klemler damarların daha iyi tutulmasını destekleyen yivli çenelere sahiptir. Klemler uygulama şekline göre boyut ve çene genişliği bakımından farklılık gösterir.

Clamp are used to grip and hold bleeding vessels. Clamps have grooved jaws, which support the better holding of vessels. Depending on the type of application, clamps differ in size and jaw width.

PENSETLER TWEEZERS

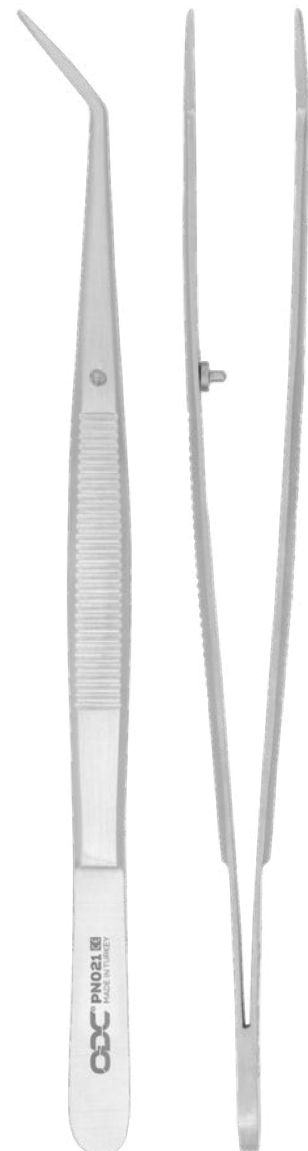

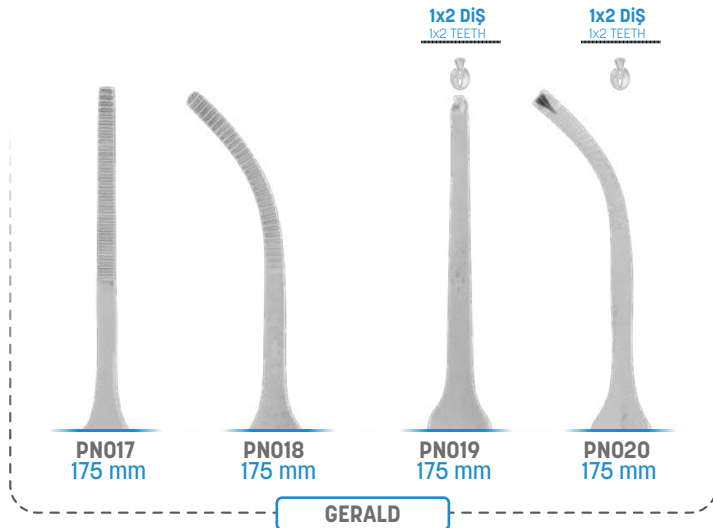

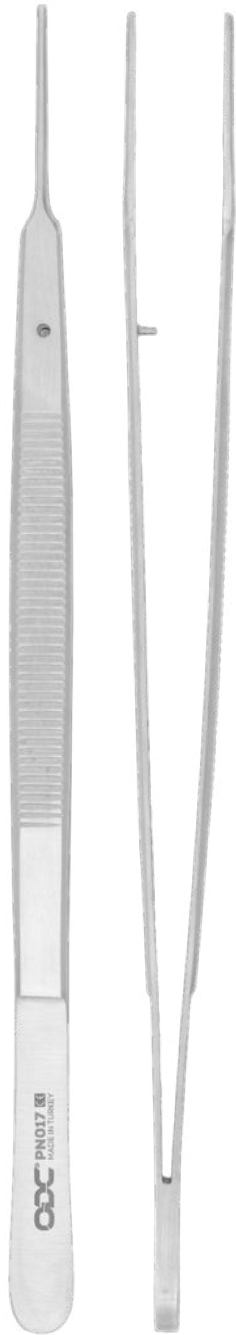

Cerrahi pensetler, dikiş atma veya diğer cerrahi prosedürler sırasında yumuşak dokuyu tutan ve stabilize eden temel dişçilik aletleridir. Örneğin; Alveol kemiğinden bir dişin çıkarılmasını içeren diş çekimi prosedürü.

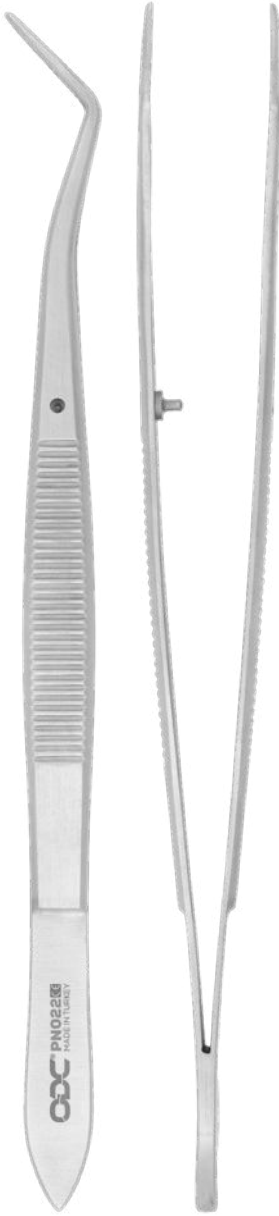

Surgical tweezers are essential dental instruments, which grip soft tissue and stabilize it during suturing or other surgical procedures. For example; Dental extraction procedure, which involves the removal of a tooth from the alveolar bone.

KEMİK EĞE, KÜRET ve PENS

BONE FINA, CURETTE and RONGEURS

Kemik Eğeleri; Bir cerrahi prosedür sırasında kemiğin yüzeyini kazımak ve düzleştirmek için tasarlanmış, kaba ve/ince oluklar veya diş yüzeyleri olan, elde tutulan manuel cerrahi alettir.

Kemik Küreti, kemik dokusunu kazımak veya istenen kemik yüzeyinden birikintileri ve fibröz dokuyu çıkarmak için kullanılır.

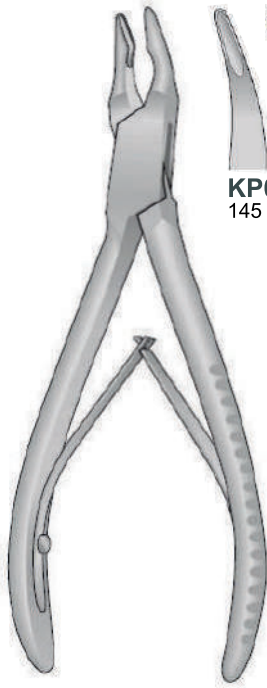

Kemik Pensi, diş çekimi sonrası kemiğin alveol kretinin keskin kenarlarının çıkarılmasında kullanılır.

Bone Fina; It is hand-held manual surgical instrument with a surfaces of coarse and/ fine grooves or teeth designed to scrape and smooth the surface of bone during a surgical procedure.

Bone curette is used to scrape bone tissue or remove deposits and fibrous tissue from the desired bone surface.

Bone Rongeur is used in the removal of the sharp edges of the alveolar crest of the bone following tooth extraction.

PERIODONTAL PERIODONTAL

Periodontal küretler, periodontal ceplerden ve düz kök yüzeylerinden diş taşlarını çıkarmak için kullanılır. Kemik Küreti, kemik dokusunu kazımak veya istenen kemik yüzeyinden birikintileri ve fibröz dokuyu çıkarmak için kullanılır.

Problar, periodontal cep derinliğini veya implant uzunluğunu ölçmek için kullanılır.

Periodontal curettes are used to remove calculus from periodontal pockets and flat root surfaces. Bone Curette is used to scrape bone tissue or to remove debris and fibrous tissue from the desired bone surface.
Probes is used to measure the periodontal pocket depth or implant length.

SANDERS

STANDART GRACEY SET (PR100)

- Derin Ölçekleme, kök planlaması ve periodontal müdahaleler için özel alan.
- Ofset bıçak diş yüzeyi için mükemmel bir çalışma açısı sağlar.
- Ofset bıçak açısı her bıçağın sadece alt kesme kenarı kullanılır anlamına gelir.

RİGİD GRACEY SET

Rigid Gracey, standart Gracey'den daha kalın, daha güçlü ve daha az esnek bir şafta sahiptir.

MAKRO GRACEY SET

- Terminal şaftı Standart Gracey'den 3 mm daha uzundur.
- Standart Gracey ile karşılaştırıldığında, Bıçak % 50 daha kısa ve % 10 daha incedir.
- Derin, dar ceplerde ölçekleme için iyidir.

MİNİ GRACEY SET

- Derin periodontal ceplere erişmek için tasarlanmış daha uzun Terminal şaft.
- Standart Gracey ile karşılaştırıldığında, dar cepler ve furkasyonlarda daha iyi adaptasyon için bıçak % 50 daha kısadır.

Ön kesici ve köpek dişleri için hafif kontra açısı

Ön kesici ve Kanin dişleri için kısa kontra açısı

Anterior ve premolar için orta kontra açısı

Premolar ve molar dişler, facial ve lingual yüzeyler için orta kontra açısı

Molar buccal ve lingual yüzeyler için uzun kontra açısı ve daha belirgin bir açısı

ÖZEL KASETLERLE SETİNİZİ OLUŞTURUN

- ODC kasetleri, uygulamanızın benzersiz ihtiyaçlarına uyacak şekilde değiştirilebilir.
- Kasetler işlem sırasında keskin parça yaralanmalarının potansiyelini azaltmak için harika bir araçtır.
- Gracey Set sizlere 3 Farklı set halinde sunulmaktadır. (Rigid Set, Makro Set, Mini Set)

SİLİKON SAP GRACEY SET

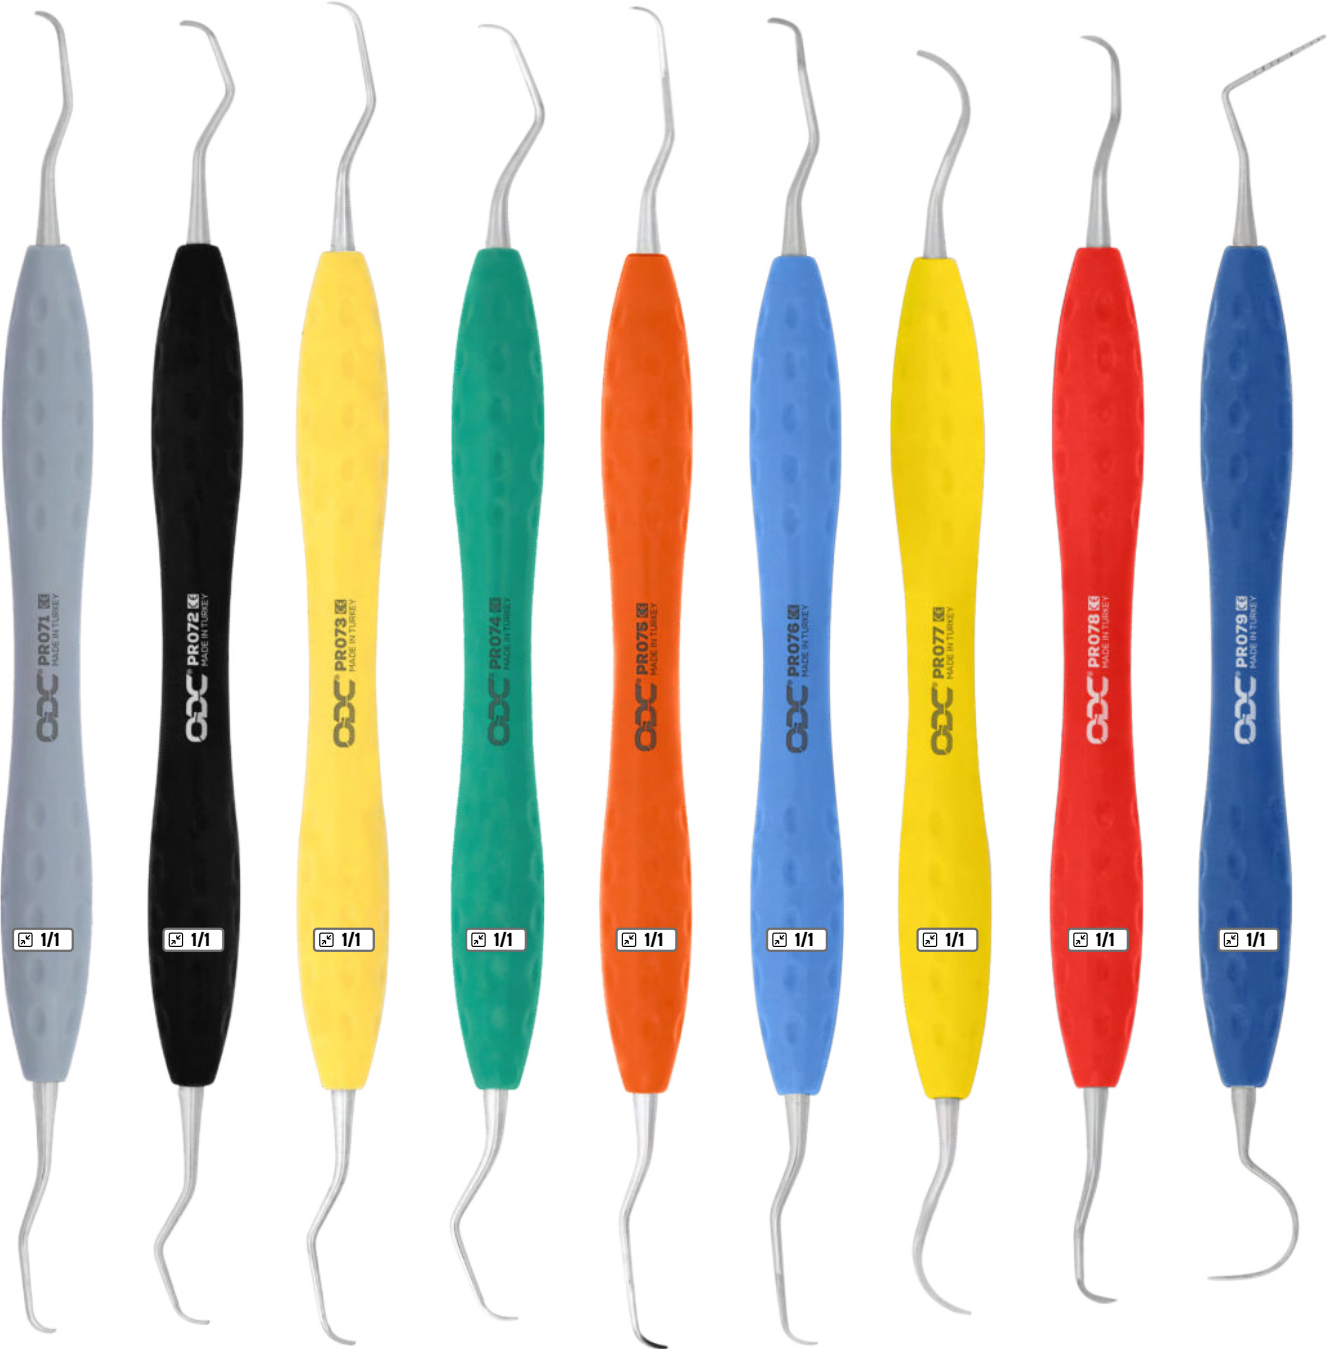

- Güç iletimi ve hassasiyeti ile ilgili mükemmel şekil, dokunsal bir ölçkleme ve temizlik sağlar.
- Silikon teknolojisi ergonomiktir, hafiftir, ağzın belirli alanlarına dayalı bir renk kodlama sistemi sunar.
- Silikon Saplar son derece ısıya dayanıklı malzemeden üretilmektedir.
- Silikon Gracey Set sizlere 4 Farklı set halinde sunulmaktadır. (Standart Set, Rigid Set, Makro Set, Mini Set)
- Kaset Sterilizasyona Dayanıklı Bir Malzemeden Üretilmiştir.

PR200

TİTANYUM İMPLANT SCALERS (PR300)

- İnce eleme ve bilenmiş titanyum işlemi ile kesim kenarları optimize edilmiş keskinliğe sahiptir.
- İmplant bakımı için geliştirilmiş özellikleri, kalkülüs ve biyofilmin çıkarılması mümkündür.
- İmplantlar ve abutmentler olarak aynı titanyum alaşımından yapılmış çalışma uçları, bu hassas yüzeyler üzerinde paslanmaz çelikten daha yumuşaktır.
- Hassas çalışma uçları, hasta konforunu artırarak periodontal ceplere daha fazla erişim sağlarken, geliştirilmiş ergonomi ve görünürlük, diş hekimlerinin en iyi performansı göstermelerine yardımcı olur.

KOMPOZİT ALETLER COMPOSITE INSTRUMENTS

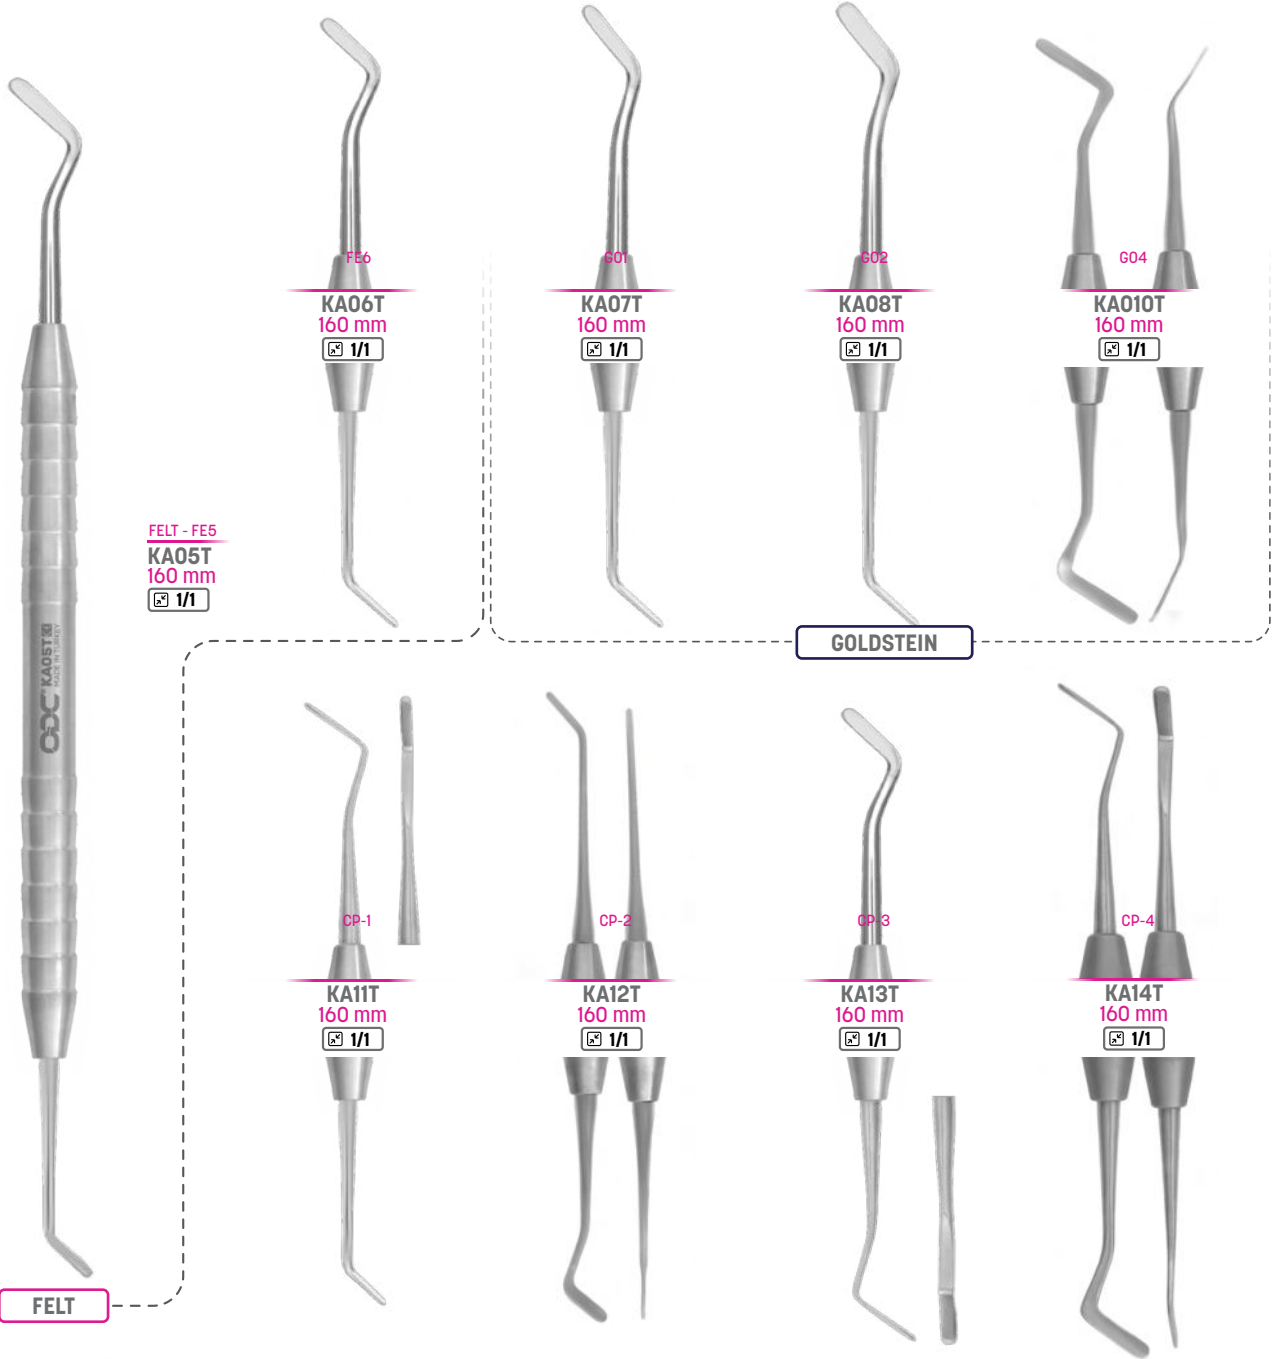

Endodontik prosedürlerde, Ekskavatörler çürükleri ve yumuşak dentini kavite duvarlarından ve zeminlerinden kazıp çıkarmak ve bunları diş dolguları için hazır hale getirmek için kullanılır. Daha sonra temizlenen bölgeye dolgu malzemesi yerleştirilir. Bu dolgu maddesini (amalgam vb.) yerleştirmek, oymak ve şekillendirmek için kompozit aletler kullanılır.

In endodontic procedures, Excavators are used to excavate and remove caries and soft dentin from cavity walls and floors, making them ready for dental fillings. Then the filling material is placed on the cleaned area. Composite instruments are used to place, carve and shape this filling material (amalgam etc.). For this reason, the products come into contact with archwire, coil springs, metal band, elastic band (auxiliary attachments), bracket, teeth, blood and bonding (adhesive) according to their intended use.

CERRAHİ SURGICAL

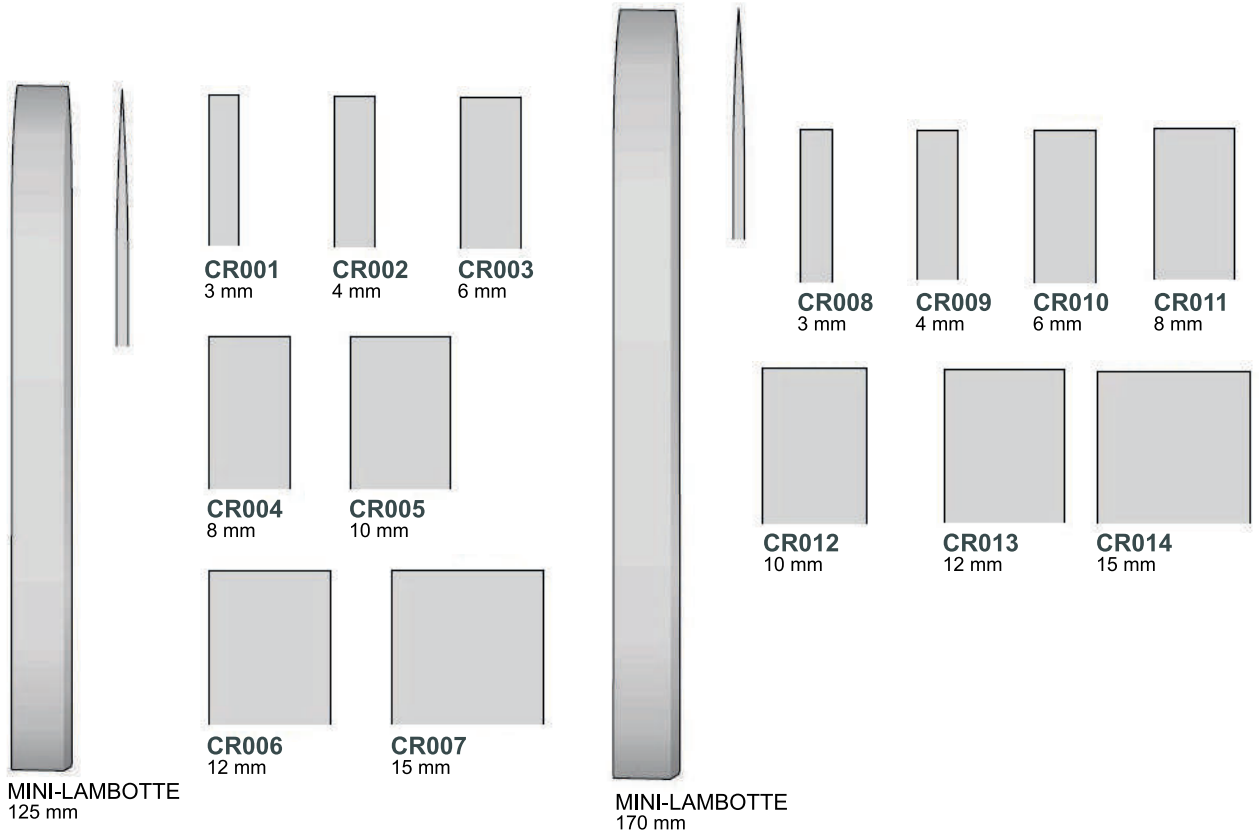

Cerrahi alet, ameliyat sırasında kullanılan bir tıbbi cihazdır. Aletlerin bozulması veya kırılması, cerrahi süreci uzatabilir, ekip stresini artırabilir ve istenmeyen komplikasyonlara yol açabilir. Dolayısıyla cerrahi girişimin başarısında cerrahi el aletlerinin yeri tartışılmazdır.

A surgical instrument is a medical device used during surgery. The malfunction or breakage of instruments can prolong the surgical process, increase team stress, and lead to unwanted complications. Therefore, the role of surgical hand instruments is indisputable in the success of a surgical procedure.

ORTODONTİ ORTHODONTICS

Küçük nesnelere tutmak veya ortodontik prosedürlerde kullanılan metal şeritleri veya telleri bükmek için kullanılır. Tipik olarak yüksek kaliteli çelikten yapılır ve proksimalde bir sap oluşturan ve amaçlanan kullanıma bağlı olarak çeşitli şekillerde mevcut olan çenelerle sonlanmak üzere bir pivot noktası boyunca distal olarak uzanan iki koldan/çubuktan oluşur.

It is used to hold small objects or bend metal strips or wires used in orthodontic procedures. It is typically made of high-grade steel and consists of two arms/rods that form a handle proximally and extend distally through a pivot point to terminate with jaws available in various shapes depending on intended use.

KONTEYNER SİSTEMLERİ

CONTAINER SYSTEMS

PRF Kutusu, Prf Fibrinlerin süzgeç üzerinde parçalanarak (standartlaştırılarak) zar haline gelmesine yardımcı olan paslanmaz bir kutudur.

PRF Box is a stainless box that helps Prf Fibrins to become a membrane by crushing (standardizing) on the strainer.
